MEXICAN OIL FIELDS

Petroleum plays an evermore important part in our "machinized" modern civilization and the regions where petroleum is found cannot but have, for every thoughtful man, a very great interest. Mexico is the latest and greatest of the "Bonanza" lands of the oil seekers, who have found there one of the richest expanses of oil producing fields that ever rewarded the toil and courage of the prospector or the confidence and capital of the exploiter. Burton Holmes has produced a picture which tells briefly and understandingly the story of a visit to the "Oil Klondyke of the Tropics" and one that will give the layman an excellent idea of just what an oil field is and just how the oil is bored for, and struck, and tanked and piped and shipped:—also some notion of the sort of men—chiefly Yanks—who are doing the work down there below the border.

For HOUSE ORGAN:

"Mexican Oil Fields" is a rapid but vivid and satisfying survey of one of the richest and most productive oil regions in the world,—with pictorial emphasis on the human-interest side of the subject; this will be shown in a Burton Holmes Travel-Picture on.....
